

# YOU CAN HELP STOP LITTERING!

**START HERE!**

**IN YOUR NEIGHBORHOOD!**

If you receive House-to-House (Curbside) Collection you can help prevent littering by doing the following:

- Place secured/tied bag(s) inside trash container(s).
- Do not overfill container(s).
- Place trash container(s) on the curbside on your collection day.
- Place container(s) away from vehicles, poles, mailboxes and other obstructions for easy hauling.
- Reduce green waste to no more than 30 lbs.
- Clean trash containers regularly.

**REMINDER:** Each household is allowed two 64-gallon trash containers with lids for solid waste collection and one 30-gallon sealed bag for green waste (leaves, small branches, etc.).

**IMPORTANT:** All other solid waste should be disposed of at the St. Croix and Susannaberg Transfer Stations or the Bovoni Landfill. When doing so, protect human health and the environment by securing and covering waste to avoid littering and receiving a citation. Household Hazardous Waste should be taken to designated drop-off sites.
